INFINITE CONTROL SWITCH

WARNING

It is illegal for persons other than licensed electrical mechanics, or persons authorized by legislation, to work on the fixed wiring of any electrical installation. Penalties for conviction are severe.

If you are not a qualified to correctly install this component it is suggested that you ask us to arrange for a serviceman or service agent to make the installation on your behalf, or obtain the services of a qualified electrician.

This switch can be used as a replacement for New Zealand Controls Ltd. energy regulators. Part numbers :-
 0534 001 552
 0534 001 566
 0534 001 567

The wiring connections to the EGO switch are shown in the electrical diagram below (fig. 2) with the New Zealand Controls Ltd. equivalent connections in brackets.

The wire loop provided with the EGO switch is to link P1 to P2 (if required). This link is internal on the New Zealand Controls Ltd. energy regulators.
